The **DIGI I**4.0 Story

We transforms IoT, AI, and Industry 4.0 from concepts to hard results

Complex Digital Landscape

Enterprises struggle with IoT, AI, and Industry 4.0

Simplify Transformation

DIGI I4.0 simplifies complex digital transformations

Seamless Integration

Integrate smart systems seamlessly

Deliver Outcomes

Deliver measurable business outcomes

Predictable Growth

Turn digital investments into predictable growth

We simplify **digital transformation** and **deliver results**

faster, safer, at scale

Our **Intelligent Offerings**

Smart products built to power progress

DigiTwin

Our unique strength is a Unified Digital Twin that seamlessly integrates EMS, optimization, and predictive analytics, for your processes and plant.

DigiVisi

The dynamic platfrom molded to be used in

- Quality Control
- Safety Control
- Driver monitoring
- Other vision use cases

DigiLogi

Driving efficiency, financial transparency & security aspects, making it a valuable solution for optimizing logistics and shipping industry

DigiWare

Advance technology used to solve your logistics problems , using OCR, Vision and UW-RFID tags for high accuracy and robust solution

Our **Ecosystem**

Energy Monitoring System

- Real-time energy tracking
- Cut costs with smart insights
- Boost efficiency with alerts

Logistics / Fleet Solutions

- Live tracking & routes
- Fuel , driver performance
- Faster, efficient deliveries

Integrated Manufacturing

- Connected machines
- Automated workflows
- Real-time control

Sustainability Solutions

- Monitor carbon footprint
- Optimize resources
- Meet ESG goals

DIGI I4.0

Device Health Monitoring

- Predict issues early
- Minimize downtime
- Performance at a glance

Energy	Aerospace	Automobile	Defense	Logistics	Heavy Engineering	Healthcare	FMCG	Transport	Connected Mobility

Problems **we solve**

Market Gap

We focus on identifying solutions for your problem statement rather than selling our solution.

Customers

71%

IoT projects fail to scale beyond pilot stage

Financials

$1.3

Trillion is wasted every year on failed digital transformation initiatives worldwide

Costs

$300

Billion lost annually due to unplanned downtime & productivity loss in manufacturing and industrial sectors

Usability

70%

of digital transformation failures are linked to lack of user adoption & usability

Why we **WIN**

Speed + Scale

Competitors drag projects for years. We deliver enterprise-grade results in months, with proven models for rapid scaling

ROI First Approcah

While competitors sell technology, we deliver measurable business outcomes — every deployment is tied to ROI and productivity gains

End-to-End Execution

Others stop at strategy or pilots. We handle the full lifecycle — from design and integration to scaling and long-term support

Simplicity in Adoption

Most Industry 4.0 tools fail due to complexity Our solutions are intuitive, user-friendly, and adoption-ready, cutting training and onboarding costs

Seamless Legacy Integration

Unlike rigid platforms, DIGI I4.0 connects easily with existing systems and infrastructure, reducing downtime and hidden costs

Digital **Evolution**
